The String Doll Gang

Meet [The String Doll Gang®](#) (\$10), a band of kooky characters that has been growing steadily since the initial 16 members made their debut in 2005. Handmade in Thailand, each String Doll has a double-sided fabric tag, lobster claw keyring, and a special power to help you. From Cupcake, who reminds you to savor the sweet moments in life, to AstroNeil, who encourages you to take the first step however big or small, there's a String Doll for everyone

Encyclopedia Prehistorica

[Encyclopedia Prehistorica](#) *Sharks and Other Sea Monsters* (\$21) is the second entry in the Encyclopedia Prehistorica series of pop-up books, which began with *Dinosaurs*. Covering the Paleozoic, Mesozoic, and Cenozoic Eras, and their changing environments and inhabitants, *Sharks and Sea Monsters* includes some high-profile predators, like the eight-ton sarcopterygian (a crocodilian with a really bad overbite), and a massive megalodon (a shark ancestor that could swallow a hippopotamus whole). But the pops are the main event. These feats of paper engineering are amazingly detailed works of art. The sharks practically leap off the page. Does anyone hear the *Jaws* theme playing?
